Professional Summary

Software Engineer experienced in building production-grade web applications across the full stack, from REST APIs and authentication to responsive frontends. Now focused on integrating AI into real products using LLMs, vector databases, and ML models, while continuing to grow as an engineer.

Technical Skills

Languages: JavaScript, Python, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, Zustand, Formik

Backend: Node.js, Express.js, FastAPI, RESTful APIs, JWT, Socket.io, WebSockets

Databases: MongoDB, PostgreSQL, Firebase

AI & ML: Google Gemini API, OpenAI API, scikit-learn, SHAP, Pandas, NumPy, RAG Pipelines

DevOps & Deployment: Git, GitHub, GitLab, Vercel, Render, VPS Hosting, Docker (basic), Linux CLI

Tools & Integrations: Jira REST API, Stripe Integration, Cloudinary, Postman, n8n

Experience

Associate Software Developer

Jun 2025 – Apr 2026

Xavinerx

- Owned end-to-end development of full-stack features across four production client projects in Financial Analytics, EdTech, B2B Lead Verification, and Generative AI using the MERN stack.
- Designed and maintained secure REST APIs with JWT authentication, role-based access control (RBAC), data validation, and integrated Stripe subscriptions, webhooks, Jira REST API, and external data services.
- Optimized MongoDB queries and database indexes to improve backend performance, while collaborating in an Agile team through sprint planning, daily stand-ups, and peer code reviews.

Education

University of Engineering & Technology, Lahore

Bachelor of Science in Computer Science

Graduated 2026

- CGPA: 3.60 / 4.0

Projects

ProManage Bot | *React, Node.js, FastAPI, MongoDB, Jira API, Google Gemini, scikit-learn* | [Live Demo](#)

- Full-stack AI project management tool that connects to Jira, surfaces sprint insights via a Gemini-powered chat interface, and keeps API response times under 50ms.
- Trained three ML models (Random Forest, Gradient Boosting, Isolation Forest) in a FastAPI microservice, each with a two-tier global/personal architecture that improves predictions per user over time.
- Built a continuous learning loop that collects real Jira sprint outcomes after each sprint and automatically retrains the personal duration model.

Educational Soccer | *MERN Stack, Stripe, OpenAI API, Cloudinary* | [Live Demo](#)

- Soccer club management platform with three user roles, Stripe subscription billing, and Cloudinary media uploads; deployed on VPS Hosting.
- Integrated an OpenAI-powered chatbot that answers questions based on each student's profile and progress data.

Financial Storytelling Platform | *React, Node.js, Recharts, MongoDB* | [Live Demo](#)

- Interactive stock analysis tool with drag-to-zoom charts, multi-stock comparison, and global event overlays for contextual market insights.
- Added a "Save View" feature for bookmarking chart layouts; deployed on VPS Hosting.
